# ABOUT US

IUOVA DESIGN is an Industrial Product Design company established in 2016 by Mr. Vatsal Gudhaka with the sole aim to cater to Companies and Startups to help them create a high-quality market selling product from a concept idea.

We at luova Design focus on bridging the gap between an ideas to a final market ready product. A brilliant idea in itself is not successful, it has to be executed well in physical form as a brilliant product as well. That is where we come into picture.

Our studio houses state of the art facility with proficient designers and engineers who have immense experience in creating amazing products for the clients. At luova, we not only develop products but also do market analysis, feasibility analysis, material analysis and many more crucial processes which help provide best design solutions for our clients.

Our aim is to create world class products in every aspect from aesthetics to performance and market success. We strive to achieve excellence in every aspect.
